

This is the last meeting and we started with what we did

- Dylan added the categories menu (items sorting menu) in discover and create listing
 - Works with pricing when choosing "Free"
 - No challenges
- Sashi worked on the listing page to display listing details and reviews
 - Connected to stripes API for payment
 - Redirects to leave review, then redirects to discover
 - Also worked on my-listings page to show your listing
 - Allows for updating the listing
- Hayden created the categories table to work with the category menu
 - He also made the main body for listing page
- Shon implemented admin roles/abilities for both the discover page and the users page
 - Also made a user page and made it only accessible to admins
- Joe worked on implementing the profile page
 - He has not finished the profile page but the render is working
- Told that we are technically done with the project
- Possibly make small UI changes
