

- Individual and group evaluation on canvas each week (has rubric)
- Each meeting we will talk about what we did in the past week, what we plan to do, and what was challenging
- Use OH for code related questions
- We might consider using a venmo api for transactions
- Ok for two people to work on same task
- Using github project board to assign tasks
- Make new branches for each feature
- Either using an SSO api or a verification code to verify CU email validation
